

Water Report

The Gervais water system consists of 2 wells, two 350,000 gallon storage reservoirs and a water treatment plant that is designed to remove the iron and manganese from the water. Currently the City of Gervais has approximately 650 active water services which serve about 2500 people. The normal water usage can vary from 4.1 to 9.2 million gallons of water per month. Water testing is 2 times per month for purity, and we are considered to have some of the finest water in the valley.

- This is our annual [Consumer Confidence Report \(CCR\)](#) on your drinking water system: The most recently required sampling results have been gathered to inform customers about their tap water. With this information, we hope you will learn more about your water and will help protect the water for future use.
